Lead Renovation Products

Chemical Stripper

Alkaline based remover will work on multiple layers of oil or water based paints on several surfaces including wood, brick, concrete, plaster and metals. PEELAWAY 1 is used extensively for the safe removal of lead based paint where the system has the advantage of always keeping the paint in a wet state so there is no worker exposure to airborne lead dust. PEELAWAY

1 product must be properly neutralized prior to recoating the surface. Pail includes pack of removal paper.

Item #	Description
PA1	PEELAWAY 1 Chemical Stripper, 5 gal Pail

Piranha 4 Paint Remover

Piranha 4 is a solvent-based gel formulated to remove multiple coats of lead-based paint. This fast acting formula starts removing most paints and stubborn coatings in less than one hour. Gel formulation yields maximum coverage per gallon and has excellent resistance to sagging, enabling it to cling to vertical and overhead surfaces.

Item #	Description
5704	Piranha 4 Paint Remover, 5 gal Pail

805 Enviowash

Sentinel 805 is specially formulated and highly concentrated. It has been designed to meet HUD Guidelines in Maryland and New York State's Phosphate rules. It can be used for lead dust clean-up and for final surface preparation of subfloors following mastic removal on asbestos abatement jobs.

Item #	Description
805	Sentinel TSP Enviro Wash, 5 gal Pail

Lead Dust Wipes

Sentinel lead dust wipes, 8" x 12", 90 wipes per tub.

FIBERLOCK LeadSafe wipes are conveniently packaged TSP presoaked wipes. For quick removal of harmful lead dust particles.

Item #	Description
ET90	Sentinel Lead Dust Wipes
5498	FIBERLOCK Lead Safe wipes

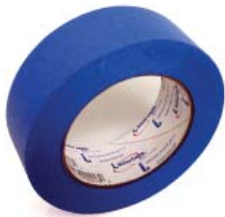

Lead Check Swabs

LeadCheck® Swabs are non-hazardous and provide a rapid, sensitive and specific test for leachable lead on any surface. When lead is detected, LeadCheck® Swabs and/or the surface being tested turns pink or red on contact, depending on the concentration of lead present. In the vast majority of test situations results are obtained in less than 30 seconds. When detecting low levels of lead, or lead chromate containing pigments, results may take longer to develop. Each kit contains test confirmation cards to verify individual test results. Since their introduction in 1992, LeadCheck® Swabs have been used to detect lead under a wide variety of field test conditions. Recognized by industry professionals for superior accuracy and sensitivity, LeadCheck® Swabs have outperformed other screening methods in every government evaluation conducted over the past 15 years.
