Safe 4 the Right Reasons 2.0

Dale stays true to his form of the original presentation but this session puts a focus on a few specific areas that affect our lives on and off the job. Distracted Driving has become a national crisis; Dale will offer some of his common sense logic to address how we can all improve in becoming Safer Drivers 4 the Right Reasons. 2.0 also looks at our use of PPE, specifically hearing protectors and will have attendees wanting to wear Hearing Protection 4 the Right Reasons not simply complying for the “ear plug police”.

Dale’s hallmark use of humor, audience participation, real world situations and laid back presentation style motivates employees to value their own personal safety and watch out for others. This session is filled with plenty of laughs & smiles because if you are laughing and smiling you are listening and learning.
